This journal and the individual contributions contained in it are protected by the copyright of Elsevier Science B.V., and the following terms and conditions apply to their use:

Photocopying

Single photocopies of single articles may be made for personal use as allowed by national copyright laws. Permission of the Publisher and payment of a fee is required for all other photocopying, including multiple or systematic copying, copying for advertising or promotional purposes, resale, and all forms of document delivery. Special rates are available for educational institutions that wish to make photocopies for non-profit educational classroom use.

In the USA, users may clear permissions and make payment through the Copyright Clearance Center Inc., 222 Rosewood Drive, Danvers, MA 01923, USA; Tel. (508)7508400; Fax (508)7504744. In the UK, users may clear permissions and make payment through the Copyright Licensing Agency Rapid Clearance Service (CLARCS), 90 Tottenham Court Road, London W1P 0LP, UK. In other countries where a local copyright clearance centre exists, please contact it for information on required permissions and payments.

Derivative works

Subscribers may reproduce tables of contents or prepare lists of articles including abstracts for internal circulation within their institutions. Permission of the Publisher is required for resale or distribution outside the institution.

Permission of the Publisher is required for all other derivative works, including compilations and translations.

Electronic storage

Permission of the Publisher is required to store electronically any material contained in this journal, including any article or part of an article. Contact the Publisher at the address indicated.

Except as outlined above, no part of this publication may be reproduced, stored in a retrieval system or transmitted in any form or by any means, electronic, mechanical, photocopying, recording or otherwise, without prior written permission of the Publisher.

Notice

No responsibility is assumed by the Publisher for any injury and/or damage to persons or property as a matter of products liability, negligence or otherwise, or from any use or operation of any methods, products, instructions or ideas contained in the material herein. Because of rapid advances in the medical sciences, independent verification of diagnoses and drug dosages should be made.

Although all advertising material is expected to conform to ethical (medical) standards, inclusion in this publication does not constitute a guarantee or endorsement of the quality or value of such product or of the claims made of it by its manufacturer.

All questions arising after acceptance of a manuscript by the editor, especially those relating to proofs, publication and reprints, should be directed to the Publisher, Elsevier Science B.V., Log-in Department, P.O. Box 2759, 1000 CT Amsterdam, The Netherlands (Fax: 31-20-485.3239). Address for courier service: Molenwerf 1, 1014 AG Amsterdam, The Netherlands.

Printed in The Netherlands

♾ The paper used in this publication meets the requirements of ANSI/NISO Z39.48-1992 (Permanence of Paper).

MR
Fundamental and Molecular Mechanisms of Mutagenesis

Master Author Index to Volumes 349–371

Aardema, M.J., Isfort, R.J., Thompson, E.D. and LeBoeuf, R.A.
The low pH Syrian hamster embryo (SHE) cell transformation assay: A revitalized role in carcinogen prediction (356) 5
Aardema, M.J., see Kerckaert, G.A. (356) 65
Aardema, M.J., see LeBoeuf, R.A. (356) 85
Abbondandolo, A., see Fronza, G. (352) 47
Abbondandolo, A., see Granetto, C. (352) 61
Abbondandolo, A., see Miele, M. (349) 209
Abdul Rahiman, M., see Shyama, S.K. (370) 175
Abe, A. and Urano, K.
Characteristics of lethal substances and the removal effect of molecular sulfur in the *Salmonella* mutagenicity test for river sediments (351) 61
Abend, M., Frombeck, S., Baaske, C. and Van Beuningen, D.
Isolation of micronuclei: high yield by sucrose gradient versus maximum purity by cell sorting (360) 23
Abramsson-Zetterberg, L., Zetterberg, G. and Grawé, J.
The time-course of micronucleated polychromatic erythrocytes in mouse bone marrow and peripheral blood (350) 349
Adair, G.M., see Smith, D.G. (352) 87
Adams, S.P., Laws, G.M., Storer, R.D., DeLuca, J.G. and Nichols, W.W.
Detection of DNA damage induced by human carcinogens in acellular assays: Potential application for determining genotoxic mechanisms (368) 235
Adeli, K., see Hasspieler, B.M. (360) 43
Adhikari, N., see Giri, A.K. (370) 1
Adler, I.-D., Anderson, D., Benigni, R., Ehling, U.-H., Laehdetie, J., Pacchierotti, F., Russo, A. and Tates, A.D.
Synthesis report of the step project detection of germ cell mutagens (353) 65
Adler, I.-D., Tinwell, H., Kliesch, U. and Ashby, J.
Activity of iPMS and nPMS in mouse bone marrow micronucleus assays: comparison with mouse dominant lethal assay data (349) 241
Adler, I.-D.
Comparison of the duration of spermatogenesis between male rodents and humans (352) 169
Adler, I.-D., see Ashby, J. (352) 153
Adler, I.-D., see Gassner, P. (367) 195
Adler, I.-D., see Izzo, M. (353) 11
Adler, I.-D., see Wyrobek, A.J. (352) 173
Adler, I.-D., see Xiao, Y. (354) 49
Adlkofer, F., see Scherer, G. (368) 195
A.D.Tates, , see Natarajan, A.T. (360) 201
Agapova, L.S., Ilyinskaya, G.V., Turovets, N.A., Ivanov, A.V., Chumakov, P.M. and Kopnin, B.P.
Chromosome changes caused by alterations of p53 expression (354) 129
Agarwal, K., see Sen, S. (371) 159
Aghamohammadi, S., see Wojcik, A. (366) 137
Aguirrezabalaga, I., see Vogel, E.W. (353) 177
Ahmad, M., see Rehana, Z. (367) 187
Ahnström, G., see Klaude, M. (363) 89
Aidoo, A., see Manjanatha, M.G. (357) 89
Aidoo, A., see Morris, S.M. (357) 143
Aillaud, M., see Salone, B. (351) 193
Aillaud, M., see Wojcik, A. (366) 137
Aizawa, S.-i., see Ishizaki, K. (364) 43
Akayeva, E.A., see Schevchenko, V.A. (361) 29
Akiyama, Y., see Lin, Y.-W. (362) 97
Alabaster, O., Tang, Z. and Shivapurkar, N.
Dietary fiber and the chemopreventive modelation of colon carcinogenesis (350) 185
Albertini, S., see Gocke, E. (350) 51
Albertini, S., see Zöhrer, E. (356) 155
AlDosari, A., McDonald, J., Olson, B., Noblitt, T., Li, Y. and Stookey, G.
Influence of benzylisothiocyanate and 13-*cis*-retinoic acid on micronucleus formation induced by benzo[*a*]pyrene (352) 1
Alexander, J., see Knasmüller, S. (350) 93
Algarra, M., see Hartman, P. (363) 201
Allan, J.M., Routledge, M.N. and Garner, R.C.
The *Escherichia coli* DNA repair protein UvrA can re-associate with the UvrB: aflatoxin B_1-DNA complex in vitro (362) 261
Altamirano-Lozano, M., see Rojas, E. (359) 77
Althaus, F.R., see Kleczkowska, H.E. (358) 215
Althaus, F.R., see Kleczkowska, H.E. (367) 151
Althaus, F.R., see Kleczkowska, H.E. (368) 121
Altshuler, M.L.
Role of *E. coli* DNA helicase II in a *umuCD*-dependent Wiegle reactivation (351) 3
Alvi, N.K., see Jain, A. (357) 83
Amara-Mokrane, Y.A., see Lehucher-Michel, M.P. (354) 1
Ambler, J.E. and Pinney, R.J.
Post-UV survival of *Escherichia coli* strains carrying more than one UV-sensitising plasmid (351) 181
Ames, B.N., see Fraga, C.G. (351) 199
Amor, E., see Guevara, A.P. (361) 67

Amor-Guéret, M., see Foucault, F. (362) 227
Amundsen, I., see Brøgger, A. (361) 73
Anderson, D., Dhawan, A., Yu, T.-W. and Plewa, M.J.
An investigation of bone marrow and testicular cells in vivo using the comet assay (370) 159
Anderson, D., Hughes, J.A., Brinkworth, M.H., Peltonen, K. and Sorsa, M.
Levels of *ras* oncoproteins in human plasma from 1,3-butadiene-exposed workers and controls (349) 115
Anderson, D., Hughes, J.A., Cebulska-Wasilewska, A., Nizankowska, E. and Graca, B.
ras oncoproteins in human plasma from lung cancer patients and healthy controls (349) 121
Anderson, D.
Antioxidant defences against reactive oxygen species causing genetic and other damage (350) 103
Anderson, D., see Adler, I.-D. (353) 65
Anderson, D., see Ashby, J. (352) 153
Anderson, D., see Sorsa, M. (355) 253
Andjelković, M., see Djelić, N. (356) 265
Andoh, T., see Aratani, Y. (362) 181
Andreassen, Å., Kure, E.H., Nielsen, P.S., Autrup, H. and Haugen, A.
Comparative synchronous fluorescence spectrophotometry and ^{32}P-postlabelling analysis of PAH-DNA adducts in human lung and the relationship to *TP53* mutations (368) 275
Andreoli, C., see Izzo, M. (353) 11
Andrew, S.E., Pownall, S., Fox, J., Hsiao, L., Hambleton, J., Penney, J.E., Kohler, S.W. and Jirik, F.R.
A novel *lacI* transgenic mutation-detection system and its application to establish baseline mutation frequencies in the *scid* mouse (357) 57
Andrews, A.M., see Morris, S.M. (357) 143
Angotzi, G., see Scarpato, R. (367) 73
Anson, R.M., see Taffe, B.G. (364) 183
Anto, R.J., George, J., Babu, K.V.D., Rajasekharan, K.N. and Kuttan, R.
Antimutagenic and anticarcinogenic activity of natural and synthetic curcuminoids (370) 127
Antoccia, A., see Parry, J.M. (353) 11
Anzidei, P., see Tedeschi, B. (356) 299
Aoki, Y., see Choi, E.K. (354) 123
Apostolides, Z., Balentine, D.A., Harbowy, M.E. and Weisburger, J.H.
Inhibition of 2-amino-1-methyl-6-phenylimidazo[4,5-*b*]pyridine (PhIP) mutagenicity by black and green tea extracts and polyphenols (359) 159
Appolloni, M., see Tedeschi, B. (356) 299
Arai, S., see Hayashi, M. (352) 117
Araj, H. and Smith, P.D.
Positional cloning of the *Drosophila melanogaster mei-9* gene, the putative homolog of the *Saccharomyces cerevisiae RAD1* gene (364) 209
Araki, K., see Mano, H. (371) 73
Aratani, Y., Andoh, T. and Koyama, H.
Effects of DNA topoisomerase inhibitors on nonhomologous and homologous recombination in mammalian cells (362) 181
Araya, J.C., see Mano, H. (371) 73
Arbour-Reily, P., see Fossett, N.G. (354) 143
Arima, M., see Watanabe, T. (369) 75
Aritomi, H., see Ikushima, T. (358) 193
Arlett, C.F., see Green, M.H.L. (350) 239
Arlett, C.F., see Petit-Frère, C. (354) 87
Armstrong, S., see Zaire, R. (371) 109
Arrand, J.E., see Joiner, M.C. (358) 171
Artuso, M., see Miele, M. (349) 209
Asakura, M., see Matsuoka, A. (369) 243
Ashby, J. and Tinwell, H.
The rodent bone marrow micronucleus assay: contrast between its sensitivity to human carcinogens and its insensitivity to NTP rodent carcinogens (352) 181
Ashby, J., Waters, M.D., Preston, J., Adler, I.-D., Douglas, G.R., Fielder, R., Shelby, M.D., Anderson, D., Sofuni, T., Gopalan, H.N.B., Becking, G. and Sonich-Mullin, C.
IPCS harmonization of methods for the prediction and quantification of human carcinogenic/mutagenic hazard, and for indicating the probable mechanism of action of carcinogens (352) 153
Ashby, J.
Chemical structure: The Cinderella of mutation research (354) 147
Ashby, J.
Genetic specificity of mutagenic action in vitro for *N,N*-dimethylacrylamide? (354) 145
Ashby, J.
Introduction to Current Issues Nos. 67–73 (352) 151
Ashby, J.
Introduction (349) 261
Ashby, J.
Lijinsky's observation that the spontaneous tumour incidence in F334 rats is unaffected by prior damage to DNA (349) 289
Ashby, J.
Naturally occurring organohalogen compounds (356) 297
Ashby, J.
Note from Editor (357) 255

Interested in Associative Learning?

OPAL is the answer! Open Programs for Associative Learning is an interactive system using computer technology and hypermedia principles to present a revolutionary approach to learning and teaching. OPAL modules provide the tools for intuitive and associative learning. By browsing freely the User can create his/her own knowledge trail.

OPAL Modules available:

OPAL

OPAL Module 1	Neural Communication
OPAL Module 2	Calcium as a Messenger
OPAL Module 3	Immune Cells
OPAL Module 4	Endocrine Cells
OPAL Module 5	Autonomic Nervous System
OPAL Module 6	Brain Aging
OPAL Module 7	Cell Structure
OPAL Module 8	Pain: Basic Science

Options

- Easy to use
- In-depth information
- Interactive animations and simulations
- Knowledge evaluation through electronic questionnaire

Seeing is believing....

so log into the OPAL Website today!

http://www.elsevier.com/locate/opal
http://www.elsevier.nl/locate/opal

ELSEVIER SCIENCE

Check out the OPAL Website for information on and demos of the OPAL Modules.

UNIVERSITY OF HAWAII

Elsevier Science on the Internet

Your comprehensive and easy-to-use guide to the world-wide range of Elsevier Science products and services.

Visit Elsevier Science on the Internet and access a unique repository of information covering the entire scientific spectrum. Our time-saving search facilities will lead you to our frequent updates in seconds.

Main features include:

- Alerting and awareness facilities for new and forthcoming publications.
- Fast, time-saving search facilities.
- Frequent updates.
